

GUDLA GANESH

DATA SCIENCE & AI ENGINEERING | FULL-STACK CAPABLE

ganeshgudla944@gmail.com · +91 93472 75583 · linkedin.com/in/gudla-ganesh-ab3816407 · github.com/ganesh-38ds

SKILLS

Languages

Python, SQL, Java, C (basic)

AI / Machine Learning

Scikit-learn, Pandas, NumPy, RAG (ChromaDB), LLM APIs (Groq, Gemini)

Web & Backend

Flask, FastAPI, SQLAlchemy, Flask-Login, HTML, CSS, JS

Data Viz & BI

Power BI, Matplotlib, Seaborn, Plotly, Excel

Databases

MySQL, SQLite, PostgreSQL-ready design

Core CS

DSA, OOP, DBMS, OS, Computer Networks

Tools

Git, GitHub, Docker, VS Code, Jupyter, Streamlit

EDUCATION

B.Tech, CSE (Data Science)

Swarnandhra College of Engg. & Tech., Narsapur (JNTUK)

2023–27 · CGPA 7.31

Intermediate (MPC)

Vidya Vikas Junior College, Sangareddygudem

2023 · 855/1000 (A)

SSC

St. Joseph's EM High School, Vellachinthalagudem

2021 · 80.83%

CERTIFICATIONS

IBM SkillsBuild

- AI Fundamentals (2025)
- Data Analysis with Python (2026)
- Python 101 for Data Science (2026)

Cisco Networking Academy

- Data Science Essentials w/ Python
- Introduction to Data Science

NPTEL Elite (IIT)

- Industry 4.0 & Industrial IoT — 72%
- Air Pollution and Control — 67%

Analytics & BI Tools

- Python + SQL + Tableau — Udemy
- Power BI for Beginners
- Business Analytics with Excel

SUMMARY

Third-year Computer Science & Engineering (Data Science) undergraduate who has shipped eight independent projects spanning retrieval-augmented generation, applied machine learning, BI dashboards, and full-stack web applications — including a live-deployed sales analytics platform. Comfortable across the stack: Python, SQL, Flask/FastAPI, and end-to-end ML pipelines. Completed a Full-Stack Development internship at Datavalley and a Data Analytics internship with SmartBridge, both under APSCHE. Seeking a Data Science, Machine Learning, or Software Development internship / entry-level role.

INTERNSHIP EXPERIENCE

Full Stack Development with Python — Intern

May – Jun 2026

Datavalley India Pvt. Ltd. (with APSCHE)

- Built and tested web application components end to end — front-end pages through back-end logic — following team coding standards and review process.
- Debugged and fixed defects across the application lifecycle, from implementation through QA, in a mentor-guided track.
- Practiced production coding habits — version control, modular code, peer review — carried directly into independent projects below.

Data Analytics with Tableau — Virtual Intern

2026 · 120 hrs

SmartBridge Educational Services (with APSCHE)

- Completed a short-term virtual internship program building Tableau dashboards for data analytics use cases.

PROJECTS

AI-Powered Data Intelligence & RAG Evaluation Platform • CAPSTONE

FastAPI · React 19 · Vite · ChromaDB · Google Gemini · Docker · Pytest

- Built an enterprise-grade RAG pipeline with multimodal document parsing (PDF, CSV, Excel) and dense semantic vector retrieval via ChromaDB.
- Implemented an automated evaluation harness measuring retrieval accuracy, faithfulness, and latency against synthetic benchmarks.
- Containerized with Docker; built a responsive React 19 + Vite dashboard.

Shadowcall-AI — Multilingual Voice & Chat Assistant

FastAPI · Groq API (LLaMA) · gTTS · Web Speech API · OpenWeatherMap API

- Built a real-time voice/text assistant with Groq-powered low-latency responses and English/Telugu language switching.
- Added document-based Q&A, reminders, and live weather via API integration, on a database-agnostic backend ready to migrate from SQLite to PostgreSQL.

AI-Powered Autonomous Data Analyst

Python · Streamlit · Groq API (Llama 3 / Qwen) · Plotly · Pandas

- Automated data cleaning and anomaly detection for raw uploaded datasets, with no manual preprocessing required.
- Built a "chat with your data" natural-language query engine and one-click executive summary generation.

Healthcare Analytics & Predictive Forecasting Dashboard

Python · Streamlit · Plotly · Scikit-learn · Pandas

- Built a 7-view dashboard analyzing 55,500+ patient records with dynamic filtering by year, condition, gender, and admission type.
- Trained Linear Regression and Random Forest models to forecast monthly patient admissions, comparing accuracy via MAE.

- Introduction to MS Excel

Development

- Full Stack Developer — OneRoadmap
- Python — CodSoft (4-wk internship)
- Data Analytics — NoviTech R&D (30d)

Workshops

- AI Trinity: ML, DL & Real-Time Modeling
- YUVA AI for ALL — GUVI-HCL

PERSONAL DETAILS

Father's Name

Gudla Manga Raju

Nationality

Indian

Languages Known

English, Telugu, Hindi

Hobbies

Exploring new AI tools, competitive coding, open-source

Crop Yield Analytics & Production Forecasting — Andhra Pradesh

Python · Power BI · Scikit-learn · Pandas · Matplotlib / Seaborn

- Analyzed 2.46 lakh rows of real government crop production data across AP districts; built an interactive Power BI dashboard with year, crop, and district slicers.
- Trained a Linear Regression model predicting Rice yield with 81% accuracy from year, area, and season.

Sales Trends & Insights Web App • LIVE

Python · Flask · Power BI · Plotly · Render · sales-qirs.onrender.com

- Deployed a production sales analytics platform visualizing multi-year revenue, profit margin, and customer segment trends, hosted live on Render.

Kaaram-Kada — Full-Stack E-Commerce Store

Python · Flask · SQLite · SQLAlchemy ORM · Flask-Login · HTML5/CSS3

- Built a complete food/snack e-commerce store with cart checkout, user authentication, inventory tracking, and an admin portal for products and orders.

Expense Tracker Pro — Personal Finance App

Python · Flask · SQLite · SQLAlchemy · Chart.js · HTML5/CSS3

- Built a personal finance web app to track income/expenses, categorize transactions, and visualize monthly budgeting health with Chart.js.
