PROFESSIONAL SUMMARY

CSE (Data Science) undergraduate (Graduating 2027) with hands-on experience building conversational AI assistants, autonomous analytics tools, and full-stack web applications. Completed 2 state-sponsored internships under APSCHE — Full-Stack Python (Datavalley) and Data Analytics with Tableau (SmartBridge). Proficient in Python, SQL, FastAPI, Flask, MySQL, SQLite, and data analysis with Pandas and Scikit-learn. Seeking an entry-level SDE / Application Development role.

TECHNICAL SKILLS

Programming Languages: Python, SQL

Databases: MySQL, SQLite

Web & Backend: FastAPI, Flask, RESTful APIs, SQLAlchemy ORM, Streamlit, HTML, CSS

AI, ML & APIs: Groq API, Google Gemini API, Scikit-learn, Pandas, NumPy

Data Visualization & BI: Tableau, Power BI, Matplotlib, Seaborn

Developer Tools: Git, GitHub, VS Code, Jupyter Notebook

INTERNSHIP EXPERIENCE

Full Stack Development with Python — Intern

May 2026 – Jun 2026

Datavalley India Pvt. Ltd. (in collaboration with APSCHE)

- Built and tested web application components end-to-end, developing front-end pages and modular Python backend logic following team coding standards.
- Designed and validated RESTful API routes and database interactions, resolving bugs identified during mentor code reviews and QA testing cycles.
- Practiced version control workflows and clean code structure using Git and GitHub.

Data Analytics with Tableau — Virtual Intern

Jun 2026 – Aug 2026

SmartBridge Educational Services Pvt. Ltd. (in collaboration with APSCHE)

- Completed a 2-month (120-hour), government-recognized virtual internship (Cert. ID: VIP-DA-2026-1323) building interactive business intelligence dashboards and analytical reports in Tableau.
- Developed dynamic visualizations, calculated fields, and multi-level filters to track core metrics and analyze categorical trends across structured datasets.
- Preprocessed and verified raw tabular datasets using Python (Pandas) to ensure data accuracy before visual dashboard design.

PROJECTS

Mikey AI | *Python, FastAPI, Groq API, Google Gemini API, Edge-TTS, Web Speech API, SQLite, PostgreSQL*

- Built an AI assistant supporting real-time voice and text chat with continuous conversational talk mode and seamless English and Telugu voice switching.
- Integrated Google Gemini Vision for image analysis and document Q&A across uploaded PDF files, utilizing Groq API for low-latency conversational responses.
- Structured the backend repository layer to be database-agnostic, supporting persistence across both SQLite and PostgreSQL without code refactoring.

AI-Powered Autonomous Data Analyst | *Python, Streamlit, Groq API, Pandas, NumPy, Matplotlib, Seaborn*

- Developed an automated data analytics web app that performs automated data hygiene, missing-value handling, and anomaly detection on uploaded CSV datasets.
- Implemented a natural-language query interface powered by Groq API, enabling users to ask questions about their data in plain English and view automated summary charts.
- Created a one-click executive summary generator that automatically summarizes key statistical distributions and metric correlations.

Expense Tracker | *Python, Flask, SQLAlchemy, SQLite, HTML, CSS*

- Engineered a personal finance web app with secure user authentication and session handling to keep individual financial records isolated.
- Designed a relational database schema using SQLAlchemy and SQLite to categorize daily expenses and generate spending-analysis summaries by category and date.
- Maintained clean modular separation between database models, route handlers, and HTML/CSS templates.

EDUCATION

Swarnandhra College of Engineering & Technology (JNTU Kakinada)

2023 – 2027

Bachelor of Technology in Computer Science & Engineering (Data Science) — CGPA: 7.31 / 10.0

CERTIFICATIONS

- Data Science Essentials with Python — Cisco Networking Academy
- Oracle Certified Foundations Associate (Agentic AI) — Oracle University
- Data Analysis with Python — IBM SkillsBuild
